With the exceptions noted below, all Great Basin units will order smokejumpers from the appropriate Great Basin Coordination Center via established dispatch channels.

- **SMOKEJUMPER NUMBERS.** See [National Interagency Mobilization Guide](#).

- **SMOKEJUMPERS GEAR WEIGHTS AND VOLUME.**

See [National Interagency Mobilization Guide](#).

- **GREAT BASIN SMOKEJUMPER BASES.**

**GREAT BASIN SMOKEJUMPER BASE (BLM).** Normally staffed with 80 smokejumpers. The primary mission of the BLM Great Basin Smokejumpers is to provide professional, effective, and safe fire suppression and fuels reduction services to BLM and interagency land managers.

Nevada, Utah, Idaho and Colorado/Wyoming have a contingent of twelve (12) smokejumpers available to them after they have been activated.

The De Havilland DHC-6 Twin Otter will be the primary aircraft utilized by the Great Basin Smokejumpers. The normal configuration for this aircraft is eight (8) smokejumpers with gear plus one (1) pilot and one (1) smokejumper spotter, both of whom stay with the aircraft.

Other aircraft used, BLM Alaska or USFS, will be pre-positioned to maximize mission effectiveness.

Additional smokejumpers or aircraft ordered to supplement operations will be coordinated by the WGBCC.

Utilization of BLM Great Basin Smokejumpers will be overseen by the BLM Fire Operations Group Manager.

**MCCALL SMOKEJUMPER BASE (USFS).** Normally staffed with 70 smokejumpers. Dispatch centers that can order direct are the Boise Dispatch Center, Central Idaho Interagency Fire Center, South Central Idaho Interagency Dispatch Center, Nez-Perce National Forest and the Wallowa-Whitman National Forest.

In order to maintain the flexibility of responding to several concurrent requests, the McCall Smokejumpers have two De Havilland DHC-6 aircraft with a standard load of 8 smokejumpers with gear.

If the need exists for more than 8 jumpers, e.g., multiple fires requiring 4-6 jumpers each, or an emerging fire that could require 14-16 jumpers, a special request for another load can be made with no delays in the departure time.

A full 20-person smokejumper crew can be delivered to an incident where a Type 1 Crew is needed. The 20-person crew request should be used in situations where all 20 jumpers would be dropped in the same location. This 20-person crew is equipped to be self-sufficient for 2 days. No pump or hose is included with this load. Concurrence of the National Interagency Coordination Center must be obtained prior to use of smokejumpers as a Type 1 Crew. See National Interagency Mobilization Guide.

- **REGION 1 SMOKEJUMPER BASES.**

**WEST YELLOWSTONE SMOKEJUMPER BASE (USFS).** The West Yellowstone, Wyoming jump base is normally staffed with 30 smokejumpers. Units that can order direct are Eastern Idaho Interagency Fire Center and Teton Interagency Dispatch Center.

**MISSOULA SMOKEJUMPER BASE (USFS).** There are normally 70 smokejumpers located at Missoula, MT. The Salmon Interagency Dispatch Center can order direct.

**GRANGEVILLE SMOKEJUMPER BASE (USFS).** There are normally 30 smokejumpers located at Grangeville, ID. The Payette Dispatch Center can order direct.

### 3     **CURRENT YEAR ROTATION.**

4  
5     All teams will adhere to the **one-week** rotation period. Teams are mobilized on a first, second  
6     and third team out basis. Once a team is mobilized or if a team is unavailable for dispatch, the  
7     next team in order of rotation will assume their position until they are mobilized or the rotation  
8     period ends. If a team is released to their home unit, has time left in the rotation period and are  
9     available, they will enter the rotation in the last position.

10  
11    If all three teams in rotation are mobilized, additional orders for Type 2 Incident Management  
12    Teams will be placed with NICC. During periods of high fire activity, the Great Basin Coordinating  
13    Group may approve early activation of Great Basin teams not in rotation. **For early activation**  
14    **justification, see Supplement 1 (IMT), H.6.**

15  
16    Alternate methods of filling team positions, other than the Command and General Staff, can be  
17    utilized and will be closely monitored. Positions may be shared by qualified people. Positions  
18    may be assigned to a department or agency to fill that has a "pool" of qualified people. It is  
19    critical that dispatch and coordination centers know the method being used, and coordinate any  
20    changes.
